

THE SOLUTION

We understand that every telco has different challenges and requirements. That's why we assess first the synergy areas to customize United Voice exactly to the specific needs of the client. Why not take advantage of Deutsche Telekom's scale, systems, network and expertise to help you manage and optimize your international voice business.

Lifecycle Management

For retail telcos wanting to focus on their core business and to optimize their financials. Deutsche Telekom Global Carrier operates client's complete international voice business long-term.

Deutsche Telekom Global Carrier main contribution

- Leverage synergies from “Best of both Worlds” in consultative approach.
- Provide link to state-of-the art network and tools
- Deliver high quality and market competitive pricing
- Route all inbound and outbound international calls
- Provide end-to-end process management
- Provide transparent view of performance

Interim Management

For clients wanting to be more efficient in non-core regions, reduce direct costs, outpayments and lessen complexity and risk. Deutsch Telekom Global Carrier operates parts of client's international voice business mid-term.

Deutsche Telekom Global Carrier main contribution

- Improve efficiency and address pain points of telcos by implementing one or more aggregation options.
- Use scale in certain regions/routes
- Provide security booster on fraud destination
- Deliver inbound Gateway function
- Provide streamlined deal management
